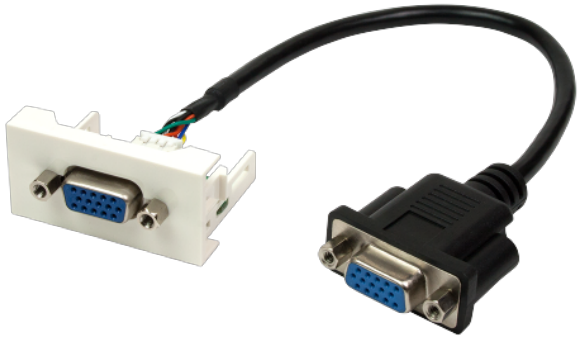
Product Data Sheet

LANMASTER, Mosaic insert, white, 20 cm



Part Number: LAN-WA-LP-VGA-FF-0.2

LANMASTER, Mosaic insert, white for copper structured cabling systems.
LANMASTER product information, specifications and part number details.

Description

The front panel is used to complete Mosaic sockets, for installation in floor hatches, minicolumns, wall blocks. The inserts have a size of 22.5x45 mm, which allows you to install 2 inserts per one mounting frame.

The front panel is designed to organize connection points for monitors or projectors with VGA/SVGA D-Sub connectors. On the front side, the module is equipped with

a D-SUB (HDB-15) connector. On the back of the panel there is a 20 cm or 3 m extension cable. The cable is terminated with a D-SUB (HDB-15) female connector, allows convenient connection of VGA cables that income from the back side of the socket.
