Perimeter sealing kit for LANMASTER DCS cabinet, 800 mm wide

Product Code: LAN-DC-CB-xxUx8-AIS

Perimeter sealing kit for LANMASTER DCS cabinet, 800 mm wide

Description

The sealing kit is designed to isolate stray airflow around the perimeter of the cabinet in the frontal plane.

When constructing cold/hot aisles, it is recommended to use the seals to prevent cooling air from leaking into the space between the mounting rails and the side walls of the cabinet.

The side parts are mounted on the end side of the vertical rails of 800 mm wide LAN-DC cabinets, the upper and lower parts are fixed to the outermost pair of rail holes at the top and bottom of the enclosure. These parts are made of metal and have rubber seals attached to them.

Model range
