RJ45 8P8C field terminated plug, shielded, category 6A

Product Code: LAN-TMP-S6A

RJ45 8P8C field terminated plug, shielded, category 6A

Description

The RJ-45 plug is designed to field termination of shielded twisted pair cable. The plug can be useful if you need to connect equipment directly without installing an RJ-45 socket.

Only a side cutter will suffice to mount the connector. A gentler termination by pressure is used instead of punching technology which improves the frequency domain characteristics. Multiple uses of the connector on different cables are allowed.

For ease of installation, the internals of the plug contain a wire map for connecting cable conductors in accordance with diagrams T568A and T568B.

The cable is securely fixed by the connector cover after termination.

Category	6A
Conductor diameter	24–22 AWG
EMI protection	Shielded
Connected conductors	Solid copper wires

Model range

LAN-TMP-S6A	RJ45 8P8C field terminated plug, shielded, category 6A
