Product Data Sheet

Brush cable entry for “Eco” floor cabinets

Part Number: TWT-CBE-BP

Brush cable entry for “Eco” floor cabinets TWT-CBE-BP: specifications, description, purpose and use in structured cabling, data center and LANMASTER infrastructure projects.

Description

The brush cable entry is designed for installation in the bottom and the roof panels of the “Eco” series floor cabinets.

The use of brush entries helps to protect the equipment in the cabinet from the dust and dirt, reduces the risk of cable damage on the edge of the entry hole, provides partial fastening of the cable routed into the cabinet.

Build as metal frame and PVC bristles.
