Product Data Sheet

Power distribution unit, 8 Schuko sockets, 19", with 1.8 m power cord

Part Number: LAN-EP19-8P/S-1.8M

Power distribution unit, 8 Schuko sockets, 19". Technical characteristics and inquiry information for the LANMASTER catalog.

Description

The power distribution unit (PDU) is intended for supplying power and protection of computers, electronic equipment, and devices in telecommunication cabinets and racks.

The PDU solves the problems of insufficient length of equipment power cords, ease of access and maintenance.

The PDU is 1U high and can be mounted in regular 19” cabinets and racks. Power switch has a backlit.

The unit comes in two versions - with or without a power cord.

Specifications:

Supply voltage is 220V.

The total load current is not more than 10A.

Dimensions (WxHxD) - 490x50x50 mm

Earth terminal and markings are on the reverse side.

It is possible to supply blocks with colored electrical sockets
