Product Data Sheet

Wire stripping tool for 0.2 - 6.0 mm

Part Number: TWT-STR-0.2-6.0

Wire stripping tool for 0.2 - 6.0 mm TWT-STR-0.2-6.0: specifications, description, purpose and use in structured cabling, data center and LANMASTER infrastructure projects.

Description

Designed for stripping and cutting wires, coaxial and flat multi-conductor cables with a diameter of 0.2 to 6 mm.

Has a force adjuster that allows the insulation to be stripped without damaging the wires and shield, regardless of the softness of the sheath material, and built-in wire cutters for cutting wires.

The length of insulation to be stripped (from 2 to 20 mm) is adjusted by means of a movable limiter. One of the measuring scale - in inches or millimeters - on the sides of the tool can be used for exact positioning of the limiter.

Made of PVC and cold rolled steel.

Metal part painting is powder coating.
