Product Data Sheet

TWT cable jacket striping tool

Part Number: TWT-STR-UTP

TWT cable jacket striping tool TWT-STR-UTP: specifications, description, purpose and use in structured cabling, data center and LANMASTER infrastructure projects.

Description

Designed for stripping and cutting twisted pair, coaxial and flat multi-conductor cables with a diameter of 3.5 to 9 mm.

The depth of cut is adjustable, allowing you to remove the jacket insulation without damaging the wires and shield.

Tool blades are replaceable.
