Product Data Sheet

Fiber optic connector cleaning cassette

Part Number: LAN-FT-CL/CAS

Fiber optic connector cleaning cassette LAN-FT-CL/CAS: specifications, description, purpose and use in structured cabling, data center and LANMASTER infrastructure projects.

Description

The device is designed for cleaning optical connector end faces. The lint-free cleaning tape can quickly and effectively remove dust, oil, and other contaminants from the end face of the connector.

No additional fluids or wipes are required in the cleaning process. The cleaning process takes literally seconds. The protective metal curtain prevents contaminants

from getting onto the cleaning tape that is very important for everyday use in the field (technical floors, attics, etc.).

One tape lasts over 500 cleaning cycles after which it can easily be replaced with a new one.

Types of optical connectors to clean: SC, ST, FC, LC, MPO.

Key features:

- Ease of use.
- Small dimensions.
- Ability to replace the cleaning tape.

Package includes:

- Cassette - 1 pc.
- Leatherette cover - 1 pc.
