Product Data Sheet

Cable ring for cabinet mounting rail

Part Number: LAN-CBLRNG-1U

Cable ring for cabinet mounting rail. LANMASTER rack and cabinet product for structured cabling and data center installations

Description

Cable ring organizers are designed for routing cable bundles in telecommunications cabinets and open-frame racks.

The ring can be installed inside the load-bearing frame or on the outer side of a rack, inside a floor-standing or wall-mount cabinet.

The organizer has a simple half-ring shape. Its compact width saves space while multiple mounting holes make installation convenient.
