Product Data Sheet

Brush strip for cable entry opening in the roof and the bottom panel of LANMASTER DCS cabinet

Part Number: LAN-DC-CB-BRE

Brush strip for cable entry opening in the roof and the bottom panel of LANMASTER DCS cabinet

Description

The brush strip is designed to install on cable entries and protect the interior of the cabinet from dust and dirt and prevent air leaks at the places where cables enter to the cabinet.

The use of brush entries also reduces the risk of damage to the cable from the edge of the cable entry hole.

A feature of this brush strip is that it can be installed even after the cable has been brought into the cabinet. The brush strip does not have a closed contour and is attached to the edge of the entry hole.

Fits into the appropriate holes in a roof and a bottom panel of LANMASTER DC series cabinets.
