Product Data Sheet

Floor panel for LANMASTER DC cabinet

Part Number: LAN-DC-CB-x-yy-FLRP

Floor panel for LANMASTER DC cabinet LAN-DC-CB-x-yy-FLRP: specifications, description, purpose and use in structured cabling, data center and LANMASTER infrastructure projects.

Description

LAN-DC cabinets have an open bottom. This design provides convenient cabling to the equipment in the cabinet directly from under the raised floor.

If necessary, the panel can be installed in the bottom of the cabinet, which ensures the creation of a closed space inside the cabinet.

The panel has openings for cable entry from the front and the back of the cabinet. LAN-DC-CB-BRP cable brush entries can be installed in the holes to prevent air leakage and protect the interior of the cabinet from dust and dirt.

Color is black.

Made of steel.
