Self-laminating cable labels for laser printers

Description

Self-laminating cable labels are designed for marking using a laser printer or manual marking (with a marker pen, felt-tip pen or rollerball pen).

The cable labels are supplied in A4 sheets. It is a convenient and cost-effective solution for marking and identification of wires, cables and many other products.

Self-lamination provides excellent protection for the label printable area against abrasion, water, chemicals, solvents, oils and other contaminants.

It easily adheres to paper, film, vinyl and rubber cable jackets, glass, plastic pipes, etc.

Permanent adhesive polyester film with the white print-on area is used as a base for self-laminating label.

Operating temperature range: from -40 to +125 °C.
