19" cable manager with cover

Product Code: LAN-ORG/CV-xU

19" cable manager with cover

Description

The cable manager with a cover is designed for storing excess length of patch cords, which allows you to organize the placement of cords, avoid the creation of loops, and provide good visibility of the component labels.

Cable manager is equally convenient for both optical and copper patch cords.

Distribution of cables is carried out by frequently located fingers. They are made of reinforced plastic, provide the correct support for the patch cords. The rounded surface of the fingers protects the cable jacket from damage and ensures the required bending radius.

A snap-on hinged cover allows quick access to the cords stored in the manager. The cover allows you to hide the patch cords and keep the aesthetic appearance of the patching field.

There are holes for bringing the patch cords from the back in the rear frame of the cable manager. This well suits for efficient routing of patch cords into cabinet interior.

Made of steel and reinforced plastic.

1U (WxHxD) 486x44x74 mm
2U (WxHxD) 486x85x74 mm
