19" cable manager with four Velcro ties, 1U

Product Code: LAN-ORG/VCM4-1U

19" cable manager with four Velcro ties, 1U

Description

The cable manager is designed for storing excess length of patch cords, which allows you to organize the placement of cords, avoid the creation of loops, and provide good visibility of the component.

The cable manager can be mounted in a 19 '' rack, cabinet, or wall frame.

The cable manager is 1U high, made of high-quality steel. The kit includes four Velcro ties. They are installed in special holes in the body and allow you to fix the cable bundles on the manager. The Velcro ties are made of quality material. Such ties provide soft fixation of cables, exclude overtightening and damage to the jacket. The length of the ties, as well as the presence of a buckle-loop, provides fixation of cable bundles of various sizes and the possibility of adjusting the tightening force.

The panel can also be used to close unused space, block airflow, and improve the cooling efficiency of equipment in the cabinet.

The package includes a set of cage nuts and screws for installing the organizer on the rails.
