## Flangeless Optical Adapters

**Product Code:** LAN-SC/NF-xx

Flangeless Optical Adapters

## Description

Flangeless optical adapters are using in optical sockets and high-density patch panels.

The adapter body does not have side flanges with screw holes. The flangeless adapter is fixed in the patch panel's socket using spring-loaded brackets located on the sides of the body.

Flangeless versions are available for SC type adapters and LC adapters with SC form factor. The absence of protruding parts of the body of the simplex SC adapter (or duplex LC adapter) allows them to be installed in keystone panels using TWT-OK-SC inserts.
