Keystone module for toolless termination, RJ-45, category 6, UTP, 180 degrees, white

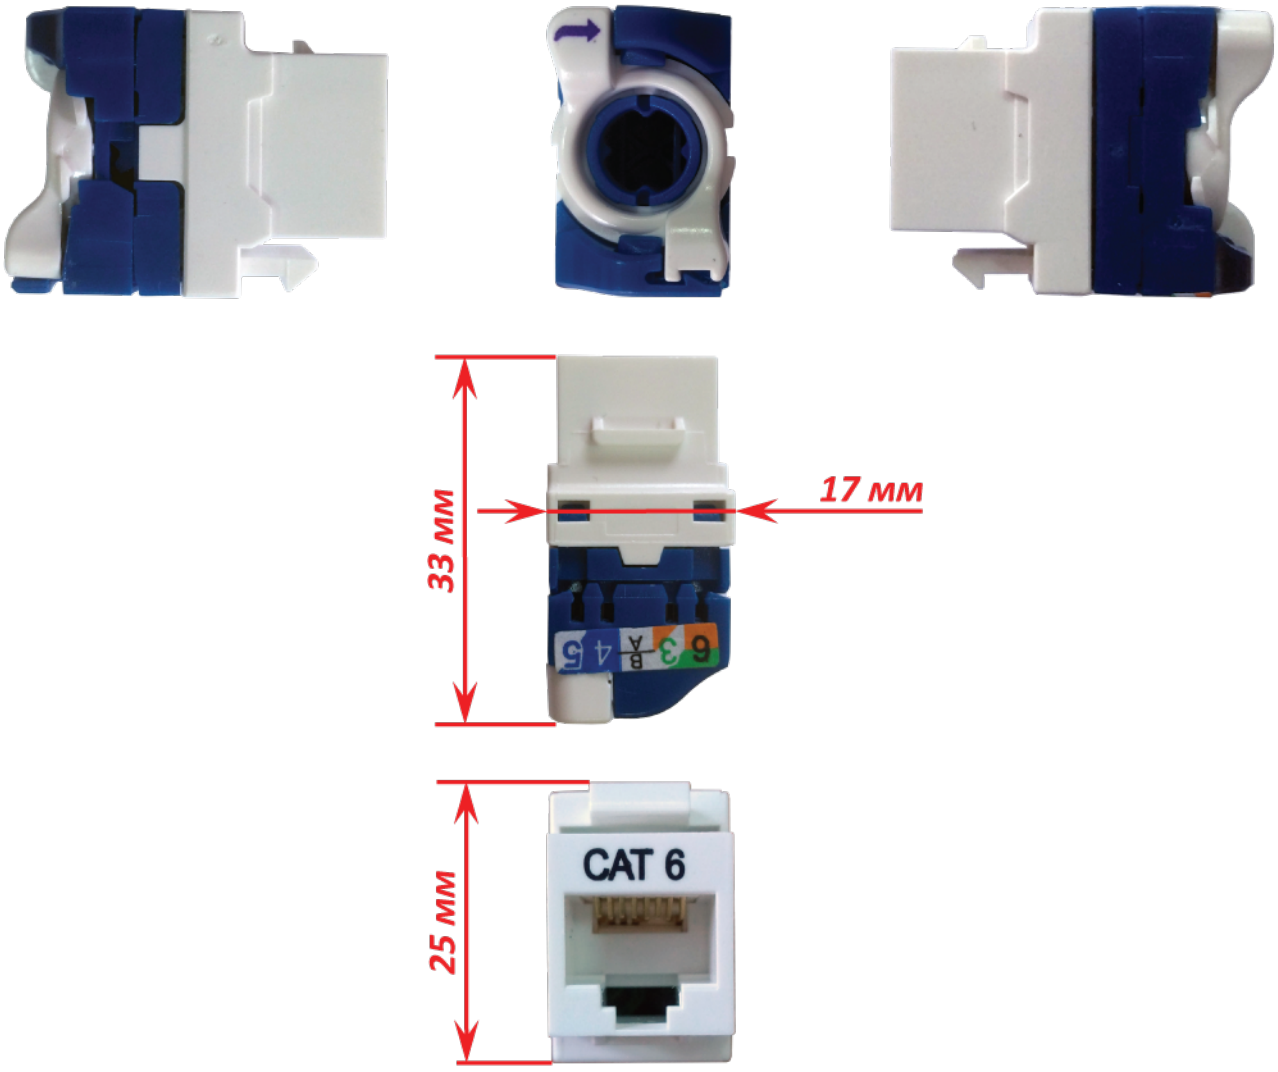

Product Code: LAN-TK45U6/180-WH

Keystone module for toolless termination, RJ-45, category 6, UTP, 180 degrees, white

Description

LAN-TK45U6/180-WH keystone module can be used to complete sockets in modular patch panels, telecommunication socket blocks installed in wall trunks and in a wall box.

Keystone modules can be used in some modular patch panels and sockets by LANMASTER and other manufacturers. There is a standard eight-pin RJ-45 socket on the front side of the LAN-TK45U6/180-WH module, and IDC-type termination block on the back side.

The insulation displacement contact method is used (IDC) to terminate incoming cable. The cable wires are laid out in the grooves on the module cover, then, if necessary, cut off. When you snap the cover and turn the mechanism in the latch, the contacts cut through the conductor insulation. Thus, the incoming cable can be easily terminated without the use of tools. The cover is color coded to match the T568A and T568B wire maps.

Model range

LAN-TK45U6/180-WH	Keystone module for toolless termination, RJ-45, category 6, UTP, 180 degrees, white
