LANMASTER FTP cat. 6 patch-cord

Product Code: LAN6-S45-45-XX-XX

LANMASTER FTP cat. 6 patch-cord

Description

Patch cords is category 6 and fully comply with ISO/IEC 11801 standards.

Patch-cords are made from shielded stranded cable with a separator and shielded Category 6 RJ-45 modular plugs.

The junction between the RJ-45 plug and the cable is filled with a plastic to ensure a strong connection between them, such a connection is called molded.

Special side ribs are provided at the molded part of the plug to protect the locking latch of the RJ-45 connector from damage and breakage. This solution does not interfere with pressing the latch.

The plug has flexible strain relief boot, which provides a given cable bending radius during operation.

Each patch cord undergoes mandatory testing for the integrity of electrical circuits, the absence of a short circuit and the correct wiring.

Continuous shield provides reliable protection of the patch cord from electromagnetic interference.

Out of production, replaced by: LAN-PC45/S6-XX-XX.
