Product Data Sheet

Patch Cord Toolkit

Part Number: LAN-NT-TK/PATCH

Patch Cord Toolkit LAN-NT-TK/PATCH: specifications, description, purpose and use in structured cabling, data center and LANMASTER infrastructure projects.

Description

The toolkit is intended to make phone and data patch cords, and twisted pair cable termination on patch panels, sockets, and cross-connect blocks.

The tools included in the kit allow cutting and stripping cables, terminating cables on IDC connectors, and crimping RJ-12 and RJ-45 plugs.

The tools are supplied in an aluminum case with compartments for easy storage and carrying.

The kit includes:

- RJ-12 and RJ-45 plug crimping tool, top crimp hole,
- Cable striping tool,
- Impact punch-down tool for interchangeable termination blades,
- 110 Termination blade with cutter,
- 66 Termination blade with cutter,
- RJ-45 8P8C Cat. 5e plug - 30 pieces,
- RJ-12 6P6C Cat. 3 - 30 pieces.
