Product Data Sheet

19" Fiber optics cable manager, 4U

Part Number: LAN-ORG/FO-4U

19" Fiber optic cable manager, 4U LAN-ORG/FO-4U: specifications, description, purpose and use in structured cabling, data center and LANMASTER infrastructure projects.

Description

It is used for arranging an excess length of optical cables, patch cords or jumpers in 19" cabinets and racks.

The cable manager has two drums for winding excess length of cords. The 4U chassis height allows you to lay the fiber optic cables within the allowable bending radius of the fiber. Laying the cables inside the manager should be done by the form of “8”.

The lockable cover allows securely protect the cables from mechanical damage.

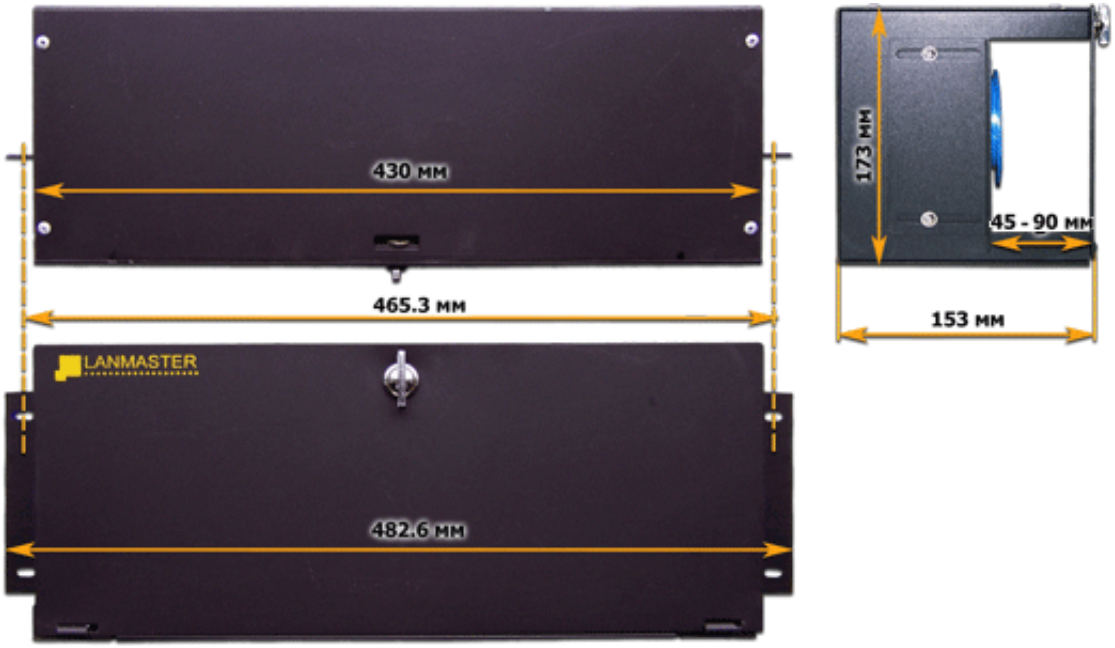

The depth of installation of the cable manager in the cabinet can be adjusted by moving the side brackets to the required distance.

Supplied assembled in an individual box.

Made of aluminum.

Powder coated.

Color is back (RAL9004).
