Product Data Sheet

Plastic Snap-In Mounting Frame, 45x90 mm, for 100 mm TWT Surface Raceway

Part Number: TWT-CT100-FLM45x90

Plastic snap-in mounting frame for 45x90 mm TWT surface raceway, designed for mounting Mosaic 45x45 faceplate outlets without tools.

Description

Plastic snap-in mounting frame designed for installation in 100 mm TWT cable channels for telecommunications, telephone, television, electrical, or other French standard Mosaic 45x45 faceplate outlets.

Existing mounting frame models allow for single (45x45 mounting frame) or dual (45x90 mounting frame) faceplate outlet installations.

Mounting frame and faceplate mechanisms are installed without tools via snap-in installation, significantly reducing installation time. Mounting frames feature alignment guides to connect frames in groups, aligning them together. The edge of the channel cover fits under the mounting frame, eliminating visible seams near the outlet.

Material – non-flammable PVC.

Color – white.
