Product Data Sheet

Supporting bracket for TWT patch panels

Part Number: TWT-CMB-PPU

Supporting bracket for TWT patch panels TWT-CMB-PPU: specifications, description, purpose and use in structured cabling, data center and LANMASTER infrastructure projects.

Description

It is used to fasten cables coming to the rear side of patch panel, providing the required bending radius and secure fixation during the termination process.

Brackets can only be used with TWT-PP24UTP and TWT-PP48UTP panels. The design of the brackets allows them to be installed after the termination of the cables, without dismantling the loaded panel. The cable is fastened with plastic ties in the holes of the bracket.

Dimensions (DxWxH) – 63 mm x 19" x 38 mm.
