Product Data Sheet

Intermediate mounting rails for “Business” series cabinets, 42U, 2 pcs., black

Part Number: TWT-CBB-TRMP-42U

Intermediate mounting rails for “Business” series cabinets, 2 pcs., black

Description

Intermediate rails for floor cabinets are designed to be installed between the front and the rear mounting rails to distribute the load and increase the load capacity of the shelves installed in the cabinet.

Intermediate rails can also be used to provide an additional point of support for cabinet mounted equipment of varying depths.

Intermediate rails are installed in the same way as the main (front and rear) rail kits. For installation in a “Business” cabinet with a width of 800 mm an additional set of **TWT-CBB-MCB** spacers is required.

It is recommended to use M6 screws with self-locking (or wing) nuts for fasten the rails.

Supplied in pairs wrapped in stretch film.

Made of metal.

Powder coating painting.
