Fan control thermostat

Product Code: TWT-CB-FAN-THR

Fan control thermostat

Description

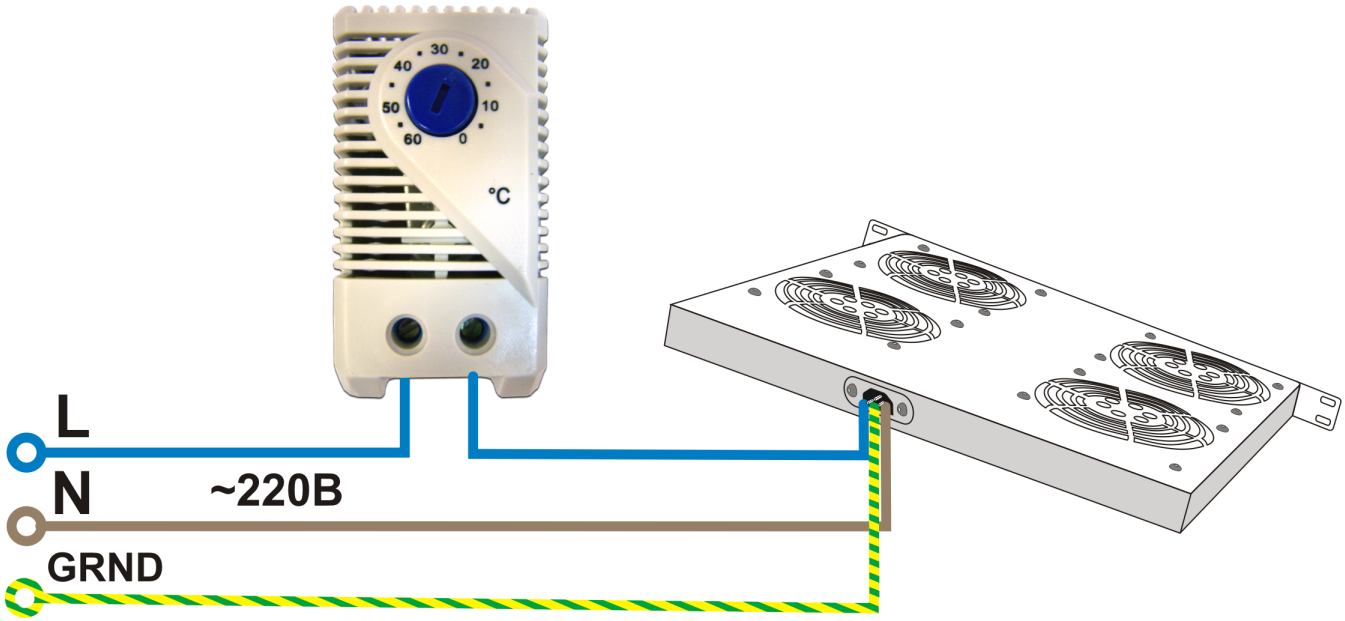

The thermostat is designed to regulate the temperature inside the telecommunication cabinet.

The temperature threshold is set by the user with the rotary knob on the thermostat body.

The temperature sensor is inside the body.

The thermostat must be connected in a break of the power supply line of the fan unit (tray).

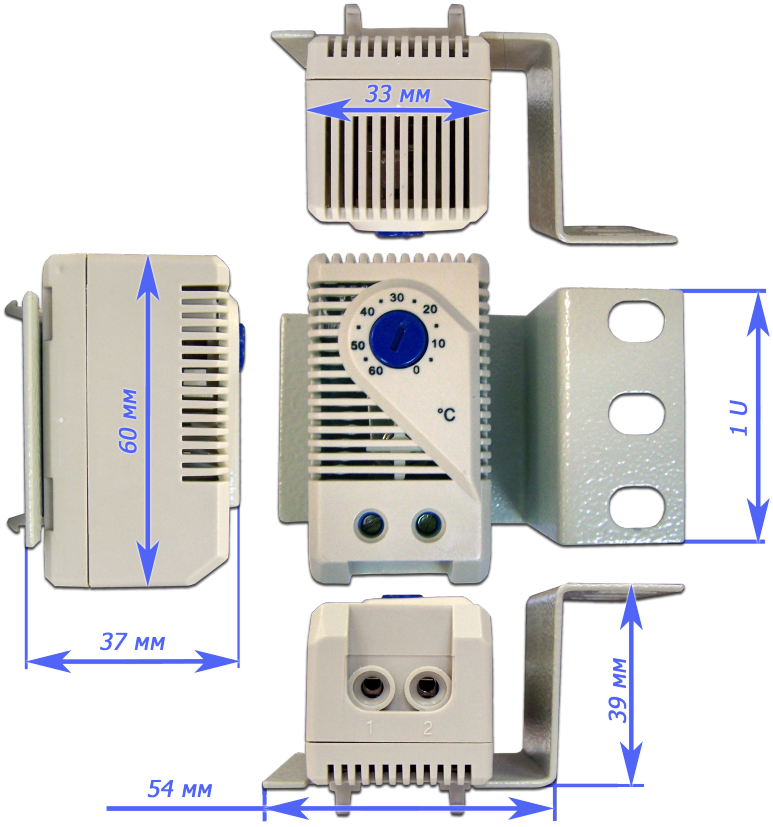

The device is installed in a telecommunications cabinet on a 1U bracket included in the package.

Specifications

Description	Value
Supply voltage	220 V ±10%
AC Frequency	50 Hz
Relative humidity	20%-85%
Temperature threshold limits	from 0 to +60°C
Accuracy of measurements	±2°C
Ambient operating temperature	from 0 to +50°C
Maximal load power	7A/250V
