LSA PROFIL disconnection module, highband, 10 pairs, for back mount frame and profile rods

Product Code: TWT-LSA10P-DIS-5E

LSA PROFIL disconnection module, highband, 10 pairs, for back mount frame and profile rods

Description

Connection modules are the basic element of the distribution point and are used to connect cables and jumper wires.

Connection modules are produced in a disconnection design. The connection of any pair of pins on a disconnection module can be temporarily interrupted using a disconnection plug.

This connection module meets the requirements of category 5E according to EN 50173/ISO 11801 and has several design differences. Each pair of the module is located at a much greater distance from neighboring pairs to reduce interference at the termination point.

The modules are intended for installation both on back mount frames and on profile rods. Fastener type is LSA PROFIL.

The top side of the module has a digital marking from 0 to 9.

The modules made of high-quality, non-flammable, non-smoky ABS plastic.

Packaged 5 pieces in a bag, 2 bags in a box.

Model range

TWT-LSA10P-DIS-5E	LSA PROFIL disconnection module, highband, 10 pairs, for back mount frame and profile rods
