LSA PROFIL disconnection module, highband, 8 pairs, for back mount frame and profile rods

Product Code: TWT-LSA8P-DIS-5E

LSA PROFIL disconnection module, highband, 8 pairs, for back mount frame and profile rods

Description

Connection modules are the basic element of the distribution point and are used to connect cables and jumper wires.

Connection modules are produced in a disconnection design. The connection of any pair of pins on a disconnection module can be temporarily interrupted using a disconnection plug.

The module design is optimized to work with 4-pair twisted pair cables and meets the requirements of category 5E according to EN 50173/ISO 11801. The module contacts have an increased distance between individual pairs to reduce interference at the termination point. The top side of the module has color marks of pairs.

Modules are designed for installation both on LSA PROFIL rods and on LSA-PLUS frames.

Module material is high-quality, non-flammable, non-smoky ABS plastic.

Packaged 5 pieces in a bag, 2 bags in a box.
