19" plastic cable manager with cover for 24 port patch panels, 1U

Product Code: TWT-ORG1U/24-CVP

19" plastic cable manager with cover for 24 port patch panels, 1U

Description

The cable manager with a cover is designed for storing excess length of patch cords, which allows you to organize the placement of cords, avoid the creation of loops, and provide good visibility of the component labels.

The cable manager has a small depth of only 50 mm. This makes it convenient, for example, to use it in a cabinet where the front rails are installed as close to the door as possible to achieve a greater installation depth.

There are holes for bringing the patch cords from the back in the base of the cable manager. Those holes are well suited for efficiently routing patch cords into cabinet interior.

The cable manager's cover allows you to hide the patch cords and preserve the aesthetic appearance of the patching field.
