Vertical power distribution unit, 20xSchuko, 250V, 16A, 3-meter power cord, Schuko plug

Product Code: TWT-PDV-20GS-GP

Vertical power distribution unit, 20xSchuko, 250V, 16A, 3-meter power cord, Schuko plug

Description

The distribution unit is intended for power distribution and protection of computers, electronic and network equipment with German style Schuko plugs in telecommunication cabinets and racks.

The PDU solves the problems of insufficient length of equipment power cords, ease of access and maintenance.

The unit is equipped with a cord with a **Schuko** plug (DIN49441) for connecting to power mains and a **16A** circuit breaker, which is used as a switch. To prevent accidental shutdown, the breaker has a protective cover.

The unit has **20** German style Schuko sockets with protective shutters (DIN49440).

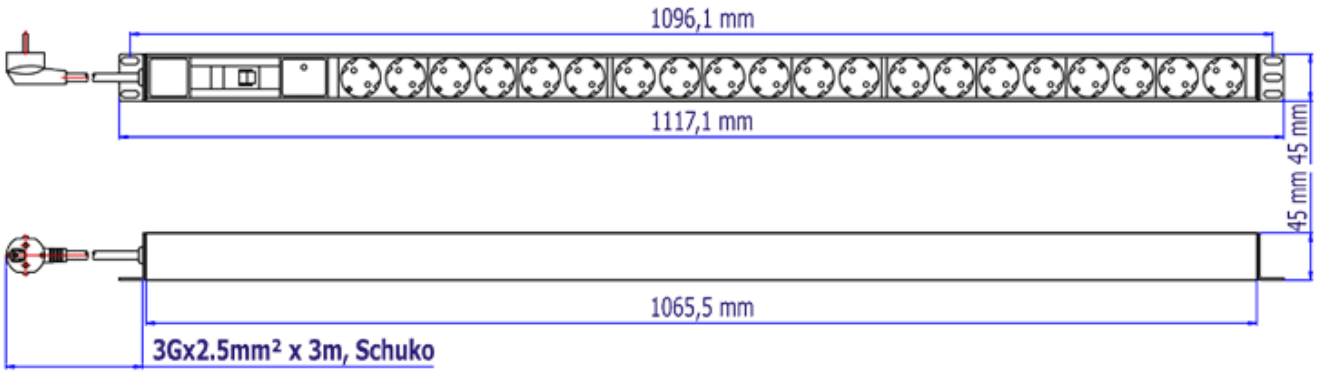

The unit is equipped with an overvoltage protection module (Surge Protector) to protect against power surges.

The distribution unit is 1.12 meter high and can be mounted vertically in 19" cabinets and racks in designated spaces.

The PDU is mounted using two mounting brackets located at the ends of the block. The design of the brackets allows them to be rotated 180° for installation parallel to the front side of the PDU.

It is recommended to use additional equipment mounting TWT-CB-BKT brackets for the missing support points when installing the PDU in cabinets and racks.

Allowed to mount the unit on the wall and other surfaces using wall mounting TWT-PPLEG-65/TWT-PPLEG-130 brackets.

Specifications:

- Supply voltage is 220V (up to 250V)
- Total load current is no more than 16A
- Dimensions (WxHxD) - 45x1117x45 mm
