TWT wall mount horizontal patch panel, 12 port, UTP, 5E

Product Code: [TWT-PP12UTP-H](#)

TWT wall mount horizontal patch panel, 12 port, UTP, 5E

Description

Patch panels are the point of consolidation of telecommunication cable lines. Cables are terminated into RJ45 modules (ports) from the back side of the panel and this cable lines are connected to active equipment with patch cords from the front side.

Patch panels are a convenient way for providing users with various services from active equipment.

The patch panel is designed for wall mounting, for which it is equipped with a plastic stand. The panel is fixed with latches on the stand.

Easy fastening on the stand allows you to quickly turn over the patch panel to work with its back side (to terminate the incoming cable).

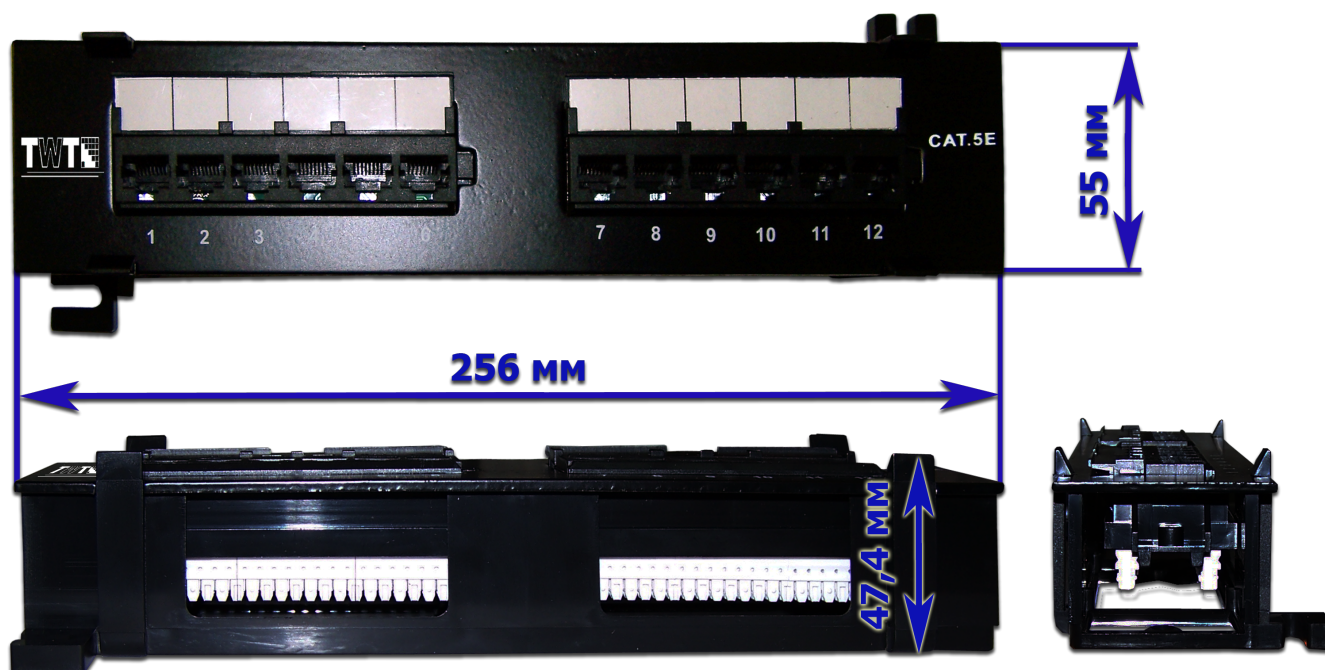

This panel is designed for horizontal installation, for which the port numbering is made with the appropriate orientation.

The small size of the patch panel and the convenient mount system allow it to be used as a consolidation point or multi-user outlet. This panel is also the main commutation equipment for small offices or retail outlets.

Features:

- Modern design and easy installation
- Category 5E compliant
