Voice patch panel, 19", 1U, 50 RJ-45 port

Product Code: TWT-PP50TEL45

Voice patch panel, 19", 1U, 50 RJ-45 port

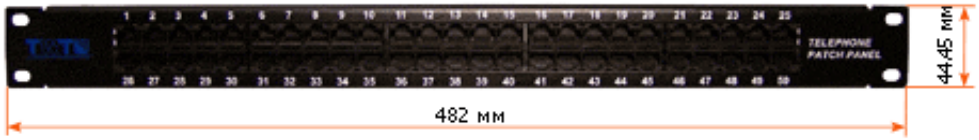

Description

19" unshielded patch panel with 50 RJ45 (8P4C) ports.

The patch panel is designed for a telephone exchange switching field with a high port density (50 ports per 1U), which allows it to be used as an alternative to a 100-pair 19" 110 distribution frame.

Patching is done using common type RJ-45 patch cords.

The panel can be used in Token Ring networks (active pins 3-6 & 4-5). In this case, network connections can be combined with voice over a single category 5e twisted pair.

Model range

TWT-PP50TEL45	Voice patch panel, 19", 1U, 50 RJ-45 port
