Product Data Sheet

Punchdown impact tool for punching contacts (without termination blades)

Part Number: LAN-PND

Punchdown impact tool for punching contacts LAN-PND: specifications, description, purpose and use in structured cabling, data center and LANMASTER infrastructure projects.

Description

Intended for twisted pair cable termination on cross-connections, patch panels or sockets.

Interchangeable blades allow you to work with any manufacturer's equipment that uses "110" and "66" type contacts.

The impact mechanism has an adjustable actuating force to ensure that the wire is properly connected to the contacts.

There is a special compartment in the handle for storing an extra blade.

Part Numbers

LAN-PND-110	Punchdown impact tool for punching contacts with 110 type termination blades
LAN-PND	Punchdown impact tool for punching contacts (without termination blades)
